**Subject:** 2015 All States Meeting - logistics and prep  
**Attachments:** EPA All States 2015 Agenda final.docx

---

Hi, everyone. Well, since it is looking a lot less likely we will have a government shut down, I guess we now have to prepare for the All States meeting which is scheduled for next Monday, October 5<sup>th</sup>. The agenda starts at 8:55, but I think we should leave at around 7:30 to account for traffic and a bit of networking prior to the meeting. I have reserved a van and Rick has reserved a sedan. I believe the following is the head count and rough seating assignments although we can adjust as necessary. Please let me know if I don't have this right. Also, if you are running late the day of or something else happens, please call either Beth's or Rick's cell phone so we aren't waiting. We will meet on the 12<sup>th</sup> floor in front of Rick and Sheila's offices (north side). I have had Jen Brave prepare "no cost" TAs for all of the ECL folks.

**Shawn** – driving POV

**Beth** – 7 total seats (cell phone (b) (6))

Cami  
Davis  
Judith  
Dennis  
Dean  
Allison

**Rick** – 5 total seats (cell phone (b) (6))

Sheila  
Rhonda  
Arthur  
Debra

Attached is the final agenda and the follow are the "assignments" for EPA-specific presentations. Please bring presentations on a thumb drive to load onto the computer.

**Rick**, I can prepare a skeleton of your "EPA Update" presentation which you can add to as you think appropriate (unless Sheila would like to do it?). My goal is to get you something by COB Tuesday.

**Cami** – I know I told you no presentations, but could you speak generally to EPA's CERCLA/CWA integration efforts? I pushed most of this to the States, but maybe 5 to 10 minutes?

**Anyone** interested in talking about *remedy optimization vs remedy failure*. I am happy to, but would also be happy to have someone else do this. The states are particular interested in the run up to the 10 year LTRA clock.

**Dean** – I think you said you were ok doing a short presentation on CERCLA Hazardous Substances vs Pollutant and Contaminants as well as identification of ARARs. I know that Andy has a good presentation on ARARs that he gave at our RPM training last year. I would plan maybe 15 minutes so there is time for discussion. Let me know if there are any questions/concerns about this.

**Shawn** – Do you want to speak briefly to the NRE SSC or can you give me some background to include? I think we accepted the state purchasing land for a borrow source as a credit which might be good to highlight.

**Mike/Allison** – Could you help me put together a one-pager on EPA policy updates (lead, TCE, dioxin, ???). I was thinking a short bullet or two on each topic along with a link to any resources (although I think all our web site links are changing as of Oct 1<sup>st</sup>....)
